

<b>Test sequence</b>	<b>ACTIVITY GUIDELINES</b>  <b>The learner must:</b> <ul style="list-style-type: none"> <li>Complete all pre-start and running checks before any activity takes place</li> <li>The shutdown and securing procedures must only be completed by the learner at the end of the test</li> <li>All additional test requirements can be completed over the period of the test duration</li> <li>Each machine has to be driven on to the transporter, secured and removed</li> <li>At the end of the test each machine must be left in the park position</li> </ul>
<b>Operator safety and observations</b>	<ul style="list-style-type: none"> <li>The transporter being loaded must be serviceable and conform to current legislation</li> <li>Any communication signals between instructor and learner must be agreed prior to loading</li> <li>All machines being loaded must be serviceable and meet the current legislation</li> </ul>
<b>Travelling to work area</b>	<b>The learner must :</b> <ul style="list-style-type: none"> <li>Travel the transporter to the loading / unloading position and set the transporter in preparation for loading and unloading machinery</li> <li>Prepare the transporter for road travel (loaded and unloaded)</li> </ul>
<b>Working tasks</b>	<ul style="list-style-type: none"> <li>Place or guide each machine on to the transporter bed</li> <li>Position and secure all machines in preparation for transportation</li> <li>Remove machines from the transporter bed</li> <li>The machinery must be placed on the transporter so not to exceed axle loads</li> <li>Correctly park all machines and return the transporter to the park position</li> </ul>
<b>Shutdown procedures</b>	<ul style="list-style-type: none"> <li>The transporter must be parked in a safe position, set ready for travel with the engine and isolator key removed and handed to the instructor</li> </ul>
<b>Additional notes</b>	<ul style="list-style-type: none"> <li>The transporter can be a rigid or articulated type transportation</li> <li>A verbal description to the instructor of the pre-start checks would be acceptable if the machine is hot</li> <li>The operator's manual must be accessible for the transporter and all participating machinery</li> <li>The transporter must be able to carry and transport all the different types of machinery to be loaded singularly or together</li> <li><b>The learner must have received appropriate training and be certificated on each category of plant they load on the transporter. Copies of operators certification for each piece of equipment being loaded must be retained for auditing purposes</b></li> <li>All securing accessories must be suitable and fit for purpose</li> <li>The weight of all machines must be known</li> </ul>
<b>Specifications</b>	<b>Load 1</b> x Tracked construction type machine <b>Load 2</b> x Wheeled construction type machine <b>Load 3</b> x Compaction type machine (i.e. roller)
<b>Test timings</b>	The full test must be completed within 2hrs
<b>Note</b>	It is recommended that all learners completing basic training receive a minimum 7hr Health, Safety, Environment and Induction Training
